

# BTBEZN1 TELEPHONE CONVERTERS.

## THE PROBLEM :

British telephones , faxes and answering machines  
will not operate in Israel  
ie they can't make, nor receive calls (also no ringing)

## TWO SOLUTIONS:

- 1 Have the appliance converted for use in Israel at a cost of NIS 70 to NIS 300 . It doesn't always work, sometimes ruins your equipment , is basically irreversible, AND you will loose your guarantee
- 2 Use an EDS BTBEZN1X plug-in converter  
The appliance will then work perfectly and the adaptor is transferable to other devices.  
Order BTBEZN1 price NIS 60 POST FREE

Fully guaranteed against manufacturing defects for 12 months from date of purchase.

Satisfaction or your money back - just return within 14 days.

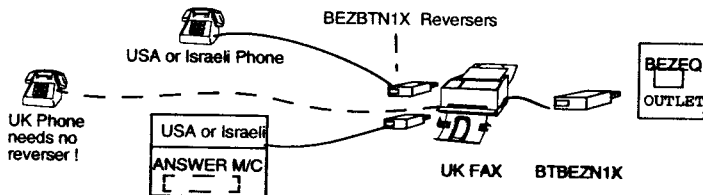

The converter is used in-line. Just plug the telephone apparatus into the converter and plug the converter into the Bezeq outlet in the wall.

The apparatus is now able to both originate and terminate calls (with ringing!).

Enables British Telecom configured telephone apparatus to be used in Israel.  
The BTBEZN1 adapters are designed to work with all phones, fax machines and answering machines that are British Telecom / Mercury approved for use in the UK.

IF YOU HAVE HAD YOUR PHONE APPARATUS CONVERTED FULLY OR PARTIALLY IN ISRAEL OR CHANGED THE PLUG OR LEAD, THE ADAPTER MIGHT NOT WORK.  
Put the original lead back on the phone, or have the store "re-adapt" the phone if necessary.

If you plug in a NON-UK answering machine or phone into your UK FAX with BTBEZN1X adaptor, you will need a BEZBTN1X reverse adaptor before it will work.
