

# GEOMETRIDAE OF SOUTH AFRICA

## with the revised species list of Transvaal

(Limpopo, Mpumalanga, Gauteng)

a temporary result of the Cesa Project  
Lepidoptera of South Africa (LZA)

by  
Ahmet Ö. Koçak<sup>1</sup> Muhabbet Kemal<sup>2</sup>

CESA<sup>3</sup>

In the previous list of the Transvaal Geometridae, totally 400 species were listed together with the alphabetically arranged synonymous names [17th June,2006]. We submitted below the revised list of the 451 species of Transvaal, among the 1026 RSA species, based upon the Info-System of the Cesa.

Species in the list (pdf) are mentioned with valid scientific names, authors, date of publications. Synonymous names (*in italics*) are arranged in chronological order. Range of each species are mentioned by using the codes of the states, provinces, territories or collecting localities. Explanations of the codes may be downloaded freely from the URL address.<sup>4</sup> Among the codes, Transvaal (Tva) can be easily seen. By this way, the species found in Transvaal can be discriminated from the others.

### List of the Species

1. **Chloroclystis consocer** L.B.Prout,1937 *consocer* L.B.Prout,1937 ZA
2. **Chloroclystis dentatissima** (W.Warren,1898) *dentatissima* W.Warren,1898 ZA Tva ZA13 Kzu ZA14 Mpu
